Kyle Field – College Station, TX photos by Bryan Pritchard, HEI PM

The Precast Concrete Manufacturers’ Association of Texas and Oklahoma awarded Heldenfels Enterprises Best of Precast in the State Bridge category for the 7th Street Bridge Project and Best of Precast in the Stadium category for the Kyle Field Redevelopment Project at its 2016 PCMA Best of Precast Awards Ceremony and Banquet last month.

HEI produced the 102 prestressed/precast concrete floor bridge beams for the new 7th St. Bridge. The complex prestressed/precast floor beams required specially designed and constructed custom stressing beds and forms. The floor beams span the width of the bridge and are connected to the arches by using a post-tensioned connection. Due to their visibility, TXDOT wanted to insure a higher quality finish. To accomplish this, HEI cast the beams with self-consolidating concrete. TXDOT was very pleased with the results.

The Kyle Field renovation project was constructed in between TAMU football schedules in two phases. HEI manufactured and erected 2600 pieces of precast consisting of 14,600 cubic yards of concrete to construct the new seating bowl. HEI also supplied the precast concrete for the North End Zone seating when it was constructed in 1999.

Heldenfels Enterprises, Inc. is a leading manufacturer of precast/prestressed concrete structures serving the highway and bridge, commercial, marine/industrial and sports facility construction markets. The company operates plants in San Marcos, and Corpus Christi as well as its newest facility in El Paso, Texas.
