FOR IMMEDIATE RELEASE:

November 20, 2012

HELDENFELS ENTERPRISES, INC. recently produced the first TxDot designed "Floor Beam" for the Seventh Street Bridge, being constructed by Sundt Construction, over the Trinity River in Ft. Worth, TX. The beams are 86' 4" long and 5' 8" deep at the midpoint or belly, and very thin at only 16". This is the first time this cross section has been designed, cast and used in Texas. Heldenfels will produce and ship 102 of these beams for erection during the first 5 months of 2013.
